Release of Video Lectures

The video is a compilation of speeches of doctors fighting directly or indirectly against Covid-19. They share their experiences, new information on corona virus, guidelines, new researches on corona viruses etc. They also inform about various aspects of vaccines, special care for children, elderly persons and co-morbidity patients. It contains various aspects of psychological and psychosocial support. The video also highlights awareness about post covid situation and health tips to the patients suffering from covid-19.
